

SIVARAM CHARAN

Full Stack Developer (MERN) | B.Tech AI Graduate | Remote-Ready Software Engineer

Rajahmundry, Andhra Pradesh, India | Open to Remote (India & International) | +91 7815806461 | sivaramcharan55@gmail.com

| GitHub: <https://github.com/SivaRam6461/> | LinkedIn: <https://www.linkedin.com/in/siva-ram-charan-934590317/> | Live Project: ekaminfra.in

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on MERN stack experience building, securing, and deploying production web applications. Delivered a live, client-facing business website (ekaminfra.in) end-to-end and shipped two full-stack platforms totaling 14+ RESTful APIs and JWT-secured authentication across 10+ protected route groups. Comfortable owning features independently in remote, asynchronous team settings — from requirements through deployment. Seeking a remote Full Stack Developer / Software Engineer role where I can ship production-grade features from day one.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript (familiar), Python
- **Frontend:** React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Backend:** Node.js, Express.js, RESTful API Design, MVC Architecture, JWT Authentication, Role-Based Access Control
- **Database:** MongoDB, Mongoose ORM, Schema Design, CRUD Operations
- **Tools & Workflow:** Git, GitHub, Postman, VS Code, npm, Remote/Async Collaboration | Familiar With: TypeScript

PROJECTS

Construction Company Website — Client Project - Live : <http://ekaminfra.in>

- Designed, developed, and deployed a production-ready business website for a real construction company, live and serving real business traffic today.
- Built fully responsive layouts validated across mobile, tablet, and desktop breakpoints for consistent UX across devices.
- Owned the project end-to-end from client requirements through deployment and post-launch support.

Food Ordering Web Application — MERN Stack — GitHub: github.com/SivaRam6461/Online-Food-Ordering-Web-Application

- Built an end-to-end food ordering platform supporting 100+ menu items with dynamic cart management and a complete order workflow.
- Implemented JWT-based authentication to secure 4 API route groups, protecting user and order data from unauthorized access.
- Designed 8+ RESTful APIs following MVC architecture for a clean, maintainable backend; tested and validated with Postman.

Travel Planner — MERN Stack — GitHub: github.com/SivaRam6461/Travel-Planner

- Developed a full-stack travel planning platform with destination browsing, trip planning, bookings, and reviews.
- Implemented JWT authentication with role-based access control to separate standard user and admin permissions.
- Built 6+ RESTful APIs supporting destinations, trip planning, bookings, reviews, and user management.

INTERNSHIP EXPERIENCE

Full Stack Development Intern — Cognifyz Technologies (Remote) | 2025

- Built and shipped full-stack features end-to-end using React.js, Node.js, Express.js, and MongoDB, following MVC design patterns for maintainable, scalable code.
- Collaborated remotely with the engineering team, delivering features independently under async workflows and code review.

Web Development Intern — Internshala (Remote) | 2024

- Built and maintained 3+ responsive, cross-browser-compatible websites using HTML5, CSS3, JavaScript, and MongoDB.
- Worked across frontend and backend tasks, optimizing assets and reducing page load time to improve overall performance.

EDUCATION

B.Tech in Artificial Intelligence — Teerthanker Mahaveer University 2022 – 2026

CERTIFICATIONS

Full Stack Development — Cognifyz Technologies | Web Development — Internshala | Python for Everybody — Coursera
