

SIVARAM CHARAN

Software Engineer | Full-Stack (MERN) Developer | B.Tech – Artificial Intelligence

Rajahmundry, Andhra Pradesh, India · Open to Remote (India) · +91 7815806461 · sivaramcharan55@gmail.com

[GitHub](#) · [LinkedIn](#) · [Portfolio](#) · [Live Project: ekaminfra.in](#)

PROFESSIONAL SUMMARY

Software Engineer with hands-on MERN experience designing, developing, testing, and deploying scalable web applications end-to-end. Strong grounding in programming fundamentals, data structures, and clean, maintainable code. Shipped a live client-facing product plus two full-stack platforms totaling 14+ RESTful APIs and JWT-secured authentication across 10+ protected route groups. Comfortable owning features independently in fast-paced, remote, async teams — from requirements through debugging, code review, and deployment. Eager to contribute to AI-powered products from day one.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

CS Foundations: Data Structures, Algorithms, Problem-Solving, OOP

Frontend: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST API Design, MVC Architecture, JWT Authentication, Role-Based Access Control

Databases: MongoDB, Mongoose ODM, Schema Design, CRUD Operations; SQL

Tools & Practices: Git, GitHub, Postman, VS Code, npm, Code Reviews, Remote/Async Collaboration

AI Dev Tools: ChatGPT, Claude, Google Gemini, Cursor AI, OpenAI Codex, Antigravity, OpenCode, OmniRoute

PROJECTS

Construction Company Website — Client Project

[Live: ekaminfra.in](#)

- Designed, developed, and deployed a production-ready business website serving real client traffic today; owned end-to-end from requirements through deployment and post-launch support.
- Built fully responsive layouts validated across mobile, tablet, and desktop breakpoints for consistent cross-device UX.

Food Ordering Web Application — MERN Stack

[GitHub](#)

- Engineered an end-to-end ordering platform supporting 100+ menu items with dynamic cart management and a complete order workflow.
- Designed 8+ RESTful APIs on an MVC architecture for a clean, maintainable, scalable backend; tested and validated with Postman.
- Secured 4 API route groups with JWT authentication, protecting user and order data from unauthorized access.

Travel Planner — MERN Stack

[GitHub](#)

- Built a full-stack travel platform with destination browsing, trip planning, bookings, and reviews.
- Implemented 6+ REST APIs and JWT authentication with role-based access control separating standard user and admin permissions.

INTERNSHIP EXPERIENCE

Full Stack Development Intern — Cognifyz Technologies (Remote)

2025

- Built and shipped full-stack features end-to-end using React.js, Node.js, Express.js, and MongoDB, following MVC design patterns for maintainable, scalable code.
- Collaborated asynchronously with the engineering team, delivering features independently under code review.

Web Development Intern — Internshala (Remote)

2024

- Built and maintained 3+ responsive, cross-browser-compatible websites; optimized assets to reduce page load time and improve performance.

EDUCATION

B.Tech in Artificial Intelligence — Teerthanker Mahaveer University

2022 – 2026

CERTIFICATIONS

Full Stack Development — Cognifyz Technologies · Web Development — Internshala · Python for Everybody — Coursera
